

A photograph of the Omni LW-GTA Mini Electric Gummed Tape Dispenser. The device is primarily black with a prominent red section on top where the tape is loaded. A control panel on the left side features a numeric keypad and a 'START' button. The 'omni' logo is visible on the red surface. The dispenser is shown from a slightly elevated angle, resting on a dark surface. A large green circle with a white border is overlaid on the image, containing the product name.

Omni Water Activated Dispensers utilise water to dispense Gummed Tape effectively and effortlessly. The water activates the adhesive, enabling the gummed tape to instantly and firmly stick to surfaces.

With a press of a button, this electronic machine dispenses the required tape length ready to apply straight onto the carton. This user-friendly gummed tape dispenser has various adjustable settings to automate your carton sealing and suit your specific packing requirements. This reliable and low-maintenance dispenser has a robust full stainless-steel structure and compact design. It features a large 2.1-litre water tank which minimises refills.

#### Key Features and Benefits:

- Large 2.1-litre water tank
- Adjustable water output, temperature settings, tape length, output speed.
- Long life blade
- Robust full stainless-steel structure
- The output of up to 1.1 metres per second
- Compact design.
