

**Compact
Honeycomb Paper
Wrap Dispenser**

Respond, Resolve, Rely, Reduce

Paperfil™ paper void fill packaging is an effective and eco-friendly way to wrap, package and protect your products while in transit. If you are wanting to switch to plastic free packaging, paper void fill is cost-effective and easy to use.

Made of 100% curb side recyclable, compostable, renewable brown kraft paper, It is versatile, durable and lightweight and low cost making it perfect for void fill packaging applications.

The paper is packed in a convenient dispenser box for both portable use and

smaller volume applications, making it easy to pull out the desired length of material without a dispenser machine required. PaperFil void fill packaging acts as a good shock absorber, protecting and cushioning your products during rough handling and transit. By using less material, you can lower storage and shipping costs, while also supporting environmental sustainability.

By choosing Paperfil™ paper void fill packaging, you can ensure your products are safe and secure during transit in the most eco-friendly way possible.
